2020

**NISHIKAWA  
ARCHERY**

*Inheriting the experience, know-how, and the spirit of “N”, combining them with the newest machining technology, Nishikawa Archery was born.*

# Unique Features

## The unidirectional limb holding system

The limb bolt swings and fits the angle of the limb surface.

Increases contact area, providing extreme stability like a one-piece bow!

## The eccentric locator system (PAT.No.6514379)

Provides fast and easy centre alignment tuning

Minimise both vertical and horizontal vibration!

**Compatible with most ILF limbs on the market**

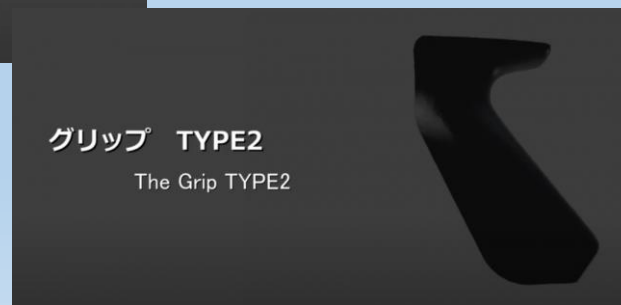

# Unique Features

## The Movable plunger system

Pressure points can be selected out of 4 positions, depending on the archer's physical characteristics.

This system enhances archers' comfort while shooting, as well as reducing muscle fatigue.

(Patent No. 6446148)

## The Grip (TYPE1, TYPE2)

Achieving superior efficiency and performance: by minimising the curve (R), the position is determined at the instant you hold the grip.

When held, the feeling and stability of the comfort designed grip will make a deep impression on you.

# Specifications

**Available in 25" and 23", both RH and LH**

**Material:** A6061-T6 Aluminum Alloy

**Weight:** 1190g(23"),1370g(25")

**Colour:** Shikkoku (Black),  
Hakkin (Silver), Ruri (Blue),  
Enji (Red), Uguisu (Green)

**Threads:** Imperial (stabilisers, clicker, sight etc.)

**Feel the next generation of  
Olympic recurve bow!**

Established in 1960

Small company of metal processing in Edowaga-ku, Tokyo

Doing metal processing (steel, stainless steel, copper, aluminum, titanium), engineering Plastic (vinyl chloride acrylic, PEEK)  
Combining total technical ability; machining, processing, welding, we are producing:  
Fixing jigs for industrial equipment,  
Devices and equipment for medical science research,  
and other mechanical devices

SAKURA SH-02 is manufactured by the newest 5 axis machining centre!
